REQUIREMENT:

Departmental Requirement Cite: CIA-C-SRO 86, 362
 COMIREX Basic Requirement Cite: BF G-04
 NPIC/IEG/EGD/NKB Project 222995CI

COLLATERAL:

NOTE: This report is published as an interim Basic Report with the concurrence of DIA.

INSTALLATION: Chin-chi Barracks Area SW, Lan-chou MR, China

LOCATION: Chin-chi Barracks Area SW is in the center of Ching-tung-hsia, which is 6.2 nautical miles southwest of Chin-chi.

GENERAL: This small wall-secured installation is in a small city which is comprised primarily of construction camps or communes associated with a hydroelectric dam project situated on the southwest corner of the city, on the Huang Ho (river).

25X1

The barracks area, first photographed on [redacted] [redacted] has undergone small expansion projects periodically since then, and was undergoing construction when last seen on [redacted]

25X1

25X1

The generally informal configuration of this installation and the vehicular activity observed indicate a small military engineer installation probably involved with the hydroelectric construction activity in the area.

25X1

Accuracy Statement: [redacted]

25X1

[redacted] Conversion from square meters to square feet was determined by the factor: 1 square meter equals 10.76 square feet.

The number in parentheses after vehicle storage building dimensions (e.g. 7-10w) indicates the estimated building capacity for wheeled vehicles based on a CIA/IAS study.¹
